

Laser Bahia

The next generation Laser Bahia is the ultimate family friendly day sailor. Spacious and easy use, the Bahia provides all-around performance. A stable and sturdy design make this boat easy to sail, motor or row.

What's included

Every Bahia comes as a complete boat with a standard mainsail and roller furler jib system.

Additional options

Gennaker
Storage box
Trapeze kit
Masthead float
Oars
Outboard bracket

Accessories

Launching trolley
Top cover
Road trailer and lighting board for towing

Construction

The Bahia is a triple layer super linear foam sandwich polyethylene. The polyethylene provides a robust low maintenance boat. The foam sandwich allows you to provide a lighter hull with the same strength and rigidity.

Features

Clutter free cockpit – Has a nice sit in feel for the family and a high boom to ensure safety for all.

Storage box – Ideal for a family day out – the box is large enough to take most outboard engines 4hp or under and a set of oars. Or take a BBQ and all the food and clothing you may need for the day.

Gennaker – For off the wind performance, the Bahia gennaker kit provides additional sail area to take advantage of all sailing conditions.

Andrew Simpson Sailing Trading Limited is the commercial arm of Andrew Simpson Sailing Foundation (charity no. 8595862) and donates its net profits to that charity. Andrew Simpson Sailing Trading Limited is registered in England and Wales no. 8989016. Registered address:

CAPACITY		1-5 PEOPLE
SKILL LEVEL		BEGINNER-ADVANCED
RACE LEVEL		CLUB
OPTIMAL WEIGHT LB/KG	331/495	150/225
TRANSPORT		TRAILER

Outboard Bracket – The outboard bracket is easy to fit, just slotting into place, then you can motor your boat home if the wind dies, or leave the sails at home for a fishing trip.

Collapsible Oars – The Bahia comes with oarlocks as standard and you can buy oars that will separate into 3 sections fitting nicely into the storage box.

Simple to reef – On windy days the single line reefing system makes it quick and simple to reduce the sail area.

Masthead flotation – Should you capsized the Bahia, the masthead flotation will reduce risk of total inversion even when your mainsail is reefed. The Bahia also has handles built into the hull and righting lines to make righting your boat and getting everyone back on board easy.

Demo's available – Try before you buy
